

Northeast Indiana Friends of Public Education

Mission Statement:

We are citizens, teachers, administrators, and parents united by our support for public education and by concerns for its future. Recent federal and state reform measures have created an over-emphasis on testing and have turned over public education to private interests. We believe that these reforms threaten the well-being of our children and jeopardize their futures. Our goal is to inform ourselves and to start community discussion about the impact of these measures on our public schools and, more importantly, on our children.
